INTERPOL Global DNA Profiling Survey 2019

Summary of results

Every two years, INTERPOL conducts a Global DNA Profiling Survey to monitor the use of DNA profiling and DNA databases in its member countries.

In 2019, INTERPOL's 194 National Central Bureaus (NCBs) were asked to provide their national DNA statistics as of the end of 2018. The full list of countries whose NCBs responded, is detailed on page 19.

- **110** (57 %) NCBs, representing their member countries, responded to the 2019 Survey. These results were combined with the results of the INTERPOL Global DNA Profiling Survey 2016 to give a total of **130** responses, of which:
 - **89** reported using DNA profiling in police investigations,
 - **70** reported having a DNA database (a searchable repository),
 - **31** reported having a specialized missing persons DNA database (a searchable repository),
 - **83** reported using Y-STR analysis,
 - **34** reported using mitochondrial DNA analysis.

NB: This report only contains the information which has been authorized by the member countries' NCBs to be published. Consequently, this redacted report may not reflect the current situation.

**89 INTERPOL member countries that reported using DNA profiling in police investigations
(combined results of 2016 and 2019 surveys)**

Total number of profiles for the region										10,273,272

17

Key: ▲ = Member country’s sub-bureau (a special administrative region with a delegated regional authority of a particular INTERPOL member country)
 * = Based on the response to the INTERPOL Global DNA Profiling Survey 2016 (no response in 2019)
 - = No information provided in 2016 or 2019
 X = Information redacted as no authorisation provided

INTERPOL's 194 member countries

110 countries, whose NCBs replied to the 2019 survey, are highlighted in grey.

This was combined with 20 responses from 2016, resulting in a total of 130 responses included in the report.

AFRICA	AMERICAS	ASIA	EUROPE
